

Improving your process · Enhancing your products · Increasing your profits

Who We Are

Founded in 1903, the Minnesota Crop Improvement Association has a long history of leadership in the seed industry and agriculture. MCIA's Field Services department continues that tradition by innovating to meet the needs of its members for impartial field inspection and facility production services.

MCIA is able to efficiently conduct and promptly complete on-site and field evaluations throughout the state, making us an ideal service provider for Minnesota ag producers. When work extends beyond the state's borders, MCIA partners with other AOSCA-member agencies.

MCIA's well trained staff has decades of experience in seed and identity preserved grain production. Our staff is trained in ISO and HACCP systems and is experienced with digital reporting technology.

Our Services

MCIA offers industry-leading expertise in seed varietal purity and seed quality. Our services include seed certification, quality assurance, and customized, company-specific inspections.

Businesses large and small use MCIA's field inspection services. Our "boots on the ground" staff has experience with all kinds of inspections, from small plots to large acres:

- Stand inspections
- Flower inspections
- Post-herbicide spray inspections
- Pre-harvest seed quality inspections
- Independent, third-party, trait stewardship field and facility verification and audits

To discuss how MCIA can best serve the needs of your business, please contact Field Services Manager Kris Folland by telephone, 218-791-2156, or email, kris.folland@mncia.org.
